(a) Probability Distribution $P_k = \Omega(N,k)/2^N$
Probability P_k
Number of heads k
N = 20
N = 50
N = 80
N = 100
(b) Macrostate Multiplicity $\Omega(N,k)$
Multiplicity $\Omega(N,k)$
Number of heads k
N = 20
N = 50
N = 80
N = 100
